	Geoffrey S Evans	1725	
The MAILING DATE of this communication a	ppears on the cover she tw	ith th correspondence ad	dress
Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REF THE MAILING DATE OF THIS COMMUNICATION  - Extensions of time may be available under the provisions of 37 CFR after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a r  - If NO period for reply is specified above, the maximum statutory perion  - Failure to reply within the set or extended period for reply will, by stat  - Any reply received by the Office later than three months after the ma earned patent term adjustment. See 37 CFR 1.704(b).  Status	N. 1.136(a). In no event, however, may a eply within the statutory minimum of thiod will apply and will expire SIX (6) MORAGE (6) tute, cause the application to become A	reply be timely filed  rty (30) days will be considered timel  NTHS from the mailing date of this or  BANDONED (35 U.S.C. § 133).	
1) Responsive to communication(s) filed on 0	3 April 2002 .		
<u> </u>	This action is non-final.		
3) Since this application is in condition for allo	wance except for formal ma	atters, prosecution as to th	e merits is
closed in accordance with the practice und Disposition of Claims			
4) Claim(s) 1-16 is/are pending in the applicat	ion.		
4a) Of the above claim(s) 2-15 is/are withdra	wn from consideration.		
5) Claim(s) is/are allowed.			
6)⊠ Claim(s) <u>1</u> is/are rejected.			
7) Claim(s) is/are objected to.			
8) Claim(s) are subject to restriction and	d/or election requirement.		
Application Papers	,		
9)☐ The specification is objected to by the Exami	ner.		
10)☐ The drawing(s) filed on is/are: a)☐ ac	cepted or b) objected to by	the Examiner.	:
Applicant may not request that any objection to	the drawing(s) be held in abey	vance. See 37 CFR 1.85(a).	
11)☐ The proposed drawing correction filed on	is: a)  □ approved b) □	disapproved by the Examin	er.
If approved, corrected drawings are required in	reply to this Office action.		
12) ☐ The oath or declaration is objected to by the	Examiner.		
Priority under 35 U.S.C. §§ 119 and 120			
13) Acknowledgment is made of a claim for fore	ign priority under 35 U.S.C.	§ 119(a)-(d) or (f).	
a)⊠ All b)□ Some * c)□ None of:			
1. Certified copies of the priority docume	ents have been received.		
2. Certified copies of the priority docume	ents have been received in A	Application No	
3. Copies of the certified copies of the p application from the International	Bureau (PCT Rule 17.2(a)).		Stage

## **DETAILED ACTION**

Page 2

1. The substitute specification has been entered.

## Claim Rejections - 35 USC § 112

- 2. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is no disclosure of how the "mechanism for uniformizing the light to be applied in such a manner that the intensity of said light in a predetermined area on the photo mask distributes within a range of +- 11.2 % of the average intensity of said light in said area" is accomplished. There is only a mention of such a range in the "Summary of the Invention" on the last line of page 11. Presumably the "mechanism" in this phrase refers to a homogenizer such as the one disclosed in Figure 11 of the instant application, but the exact structure of that homogenizer is not disclosed (only that it would generally include a cylindrical lens or fly eye lens) and would require undue experimentation to make such a homogenizer.
- 3. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There was no disclosure in the originally filed specification that the peak intensity of the light projected and applied on

Art Unit: 1725

the semiconductor thin film is uniformized to an identical extent with the peak intensity of the intensity distribution on the photo mask.

## Response to Arguments

4. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection. Please note Applicant's argument that there is no motivation to combine the Suzuki reference with the Guenther et al. reference in the previous office action is not persuasive. Guenther et al. (752) notes in column 1, lines 28-36 that "Typical applications have included semiconductor annealing, ..... In nearly all of these applications, laser output beam intensity profile uniformity is of paramount importance." Since Suzuki merely discloses the "Beam Homogenizer" by a black box, it needs to be adapted by a specific homogenizer to be operate. Clearly one would be motivated to use the beam homogenizer that can best homogenize the laser beam.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey S Evans whose telephone number is (703)-308-1653. The examiner can normally be reached on Mon-Fri 6:30AM to 4:00 PM, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (703)-308-3318. The fax phone numbers for

(515)

Art Unit: 1725

the organization where this application or proceeding is assigned are (703)-305-7718 for regular communications and (703)-305-5585 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)-308-0661.
